

Paper Software Releases New Features to Turner

Powerful contract drafting application for Mac now offers multiple document editors to further streamline contract creation and review

NEW YORK, October 26, 2016 – Paper Software, developers of powerful applications for creating and analyzing contracts, today announces a major upgrade to Turner, a full-featured document editor that makes creating and analyzing contracts more accurate and efficient than ever before. Designed exclusively for Apple's industry-leading Mac computers, Turner offers automatic proofreading, AI-powered document importing, streamlined navigation tools, powerful search features, intuitive editing tools, and much more.

Turner's latest version introduces the Assistant Editor, a simple and elegant way to work with many parts of a contract at the same time. With the Assistant Editor, you can easily review different parts of a contract side by side, move text from one part of a contract to another, find words and phrases in one part of a contract while making changes in another, and much more.

"We originally brought Turner to the legal industry more than a year ago, and we have continuously been listening to our users and adding features to make Turner exactly what they need," said Benjamin Whetsell, co-founder of Paper Software. "This product, along with its Windows companion Contract Tools, offers unrivaled power and efficiency, and we know this new feature brings Turner to the next level."

About Paper Software

Paper Software (papersoftware.com) was founded in 2010 when brothers Benjamin Whetsell, a lawyer, and Nathan Whetsell, a computer engineer, saw a need to streamline contract creation and analysis. The company has developed Turner for Mac and Contract Tools for Windows PCs, both powerful tools for creating and analyzing contracts.
